

Wendl & Lung since 1910

Tradition - Innovation

Mod. 218 – Concert I

Technical data

- » Rigorous selection of only the finest wood contributes to the richness of tone.
- » The double asymmetric crown, a new concept in soundboard technology, is designed to achieve great richness of tone colour, an even response in all registers of the scale and stability of tuning.
- » Duplex and triplex scaling enriches the whole treble section.
- » The action has been designed according to strict scientific principles and is assembled with the greatest care to achieve the characteristic touch of the Wendl & Lung piano.
- » The efficiency of the action is optimized, giving the player a sense of control and certainty whether in the most delicate pianissimo playing or the most expressive forte.
- » A tropicalized laminated pin block provides great evenness in the tightness of the tuning pins, facilitating the work of the tuner.
- » The fallboard is provided with a child-proof soft-close system.
- » The wide casters allow the piano to be moved easily while conserving energy within the instrument.
- » The highest quality of finish down to the finest detail makes this an instrument beyond compare.

This beautifully-crafted concert grand, suitable for piano students or professional pianists alike, has the power to fill a small concert hall (up to 300 people).
